CANCOM

Microsoft 365 FastStart Service

Accelerate your transformation with Microsoft 365

Are you ready for the next step in anywhere, anytime collaboration?

Do you have a strategy to adopt Microsoft 365 or the Enterprise Mobility + Security Suite?

Are you struggling to understand where to start with identity, security or compliance?

Starting out with Microsoft 365

We understand an office migration is no small feat. Let our team of qualified and proven experts help! Through our wealth of experience we've created a comprehensive service that delivers Microsoft 365 to organizations smoothly from any configuration — public, private or hybrid.

Approach

Our consultants guide you through the entire migration and ensure all solutions function appropriately and meet expectations. In addition, the service will be delivered by a highly skilled Microsoft 365 consultant who will cross-train your team in the process.

Key Benefits

IT becomes an enabler for cloud adoption and innovation

Removes the lead time and complexity of setting up Microsoft 365

Ensures best practices for security and compliance in M365 are adopted

Helps address internal skills gaps with new cloud technology

Readiness for Enterprise Mobility and Security

Deliverables

CANCOM Expert onsite

CANCOM M365 IP

CSP contract (if required)

Microsoft 365 Post-Migration Training

What's included?

As part of this service, we'll setup and configure the following components:

Subscriptions

Configuration of Azure and M365 subscriptions and public namespaces

Identity

Configuration of Azure Active Directory and federation services to setup hybrid identity ready for consumption via Microsoft cloud services including Azure and M365

Security

Enforce Administrator access control and separation of duties, ensure continuous compliance and take full control of M365

Readiness

Clean up and optimize your environment to speed up migration, reduce costs and prevent errors downstream

Migration

Minimize the impact to your users with fewer IT resources than you thought possible. Minimize risk and business disruption through automation and scheduling.

Processes

Our well-defined migration processes from planning to configuration, post-migration support and training, help us to provide the best possible delivery
